Profile

I am a web application developer living in St. Louis, Missouri. With over three years of experience, I have demonstrated the ability to develop and support applications in a variety of languages and on multiple platforms.

Experience

Freelance Web Designer; St. Louis, MO
May 2006 to Present

- Designed and developed websites for a number of individuals and organizations.
- Collaborated with clients to establish a compelling web identity through logo creation and graphic manipulation.
- Utilized web standards for compatibility across multiple web browsers.

Level II Programmer, Global University; Springfield, MO
February 2005 to August 2008

- Recruited to maintain existing Visual Basic applications and develop new C# web based applications.
- Served as point of contact for the resolution of existing application problems and inquiries.
- Communicated and collaborated with all Information Systems staff as well as other departments throughout the development process.
- Designed, programmed, and implemented the Study Center Portal, allowing study center directors to check student grades, print reports, and order courses online.
- Completed Student Response System, enabling faculty members to efficiently manage and reply to student comments.

Education

Bachelors of Science in Computer Information Systems, 2004
Missouri State University, Springfield, MO
